in regards to proposed Court Rule No. 2003-47

The victims of asbestos lung disease should not be denied their right to jury by trial.

Why is the Michigan supreme Court even considering taking steps to change a law to deny Michigan asbestos disease victims their right to a jury trial? The judges are there to interpret the existing law not to make new laws.

Certain conservative republican judges are siding with big business to place the blame on the victims of corporate injustice instead of holding the corporations accountable.

Thank you, John F. Chlystek - Riverview, MI
